

# Moon Watch Diary

Time: 10 minutes a night for 7 nights

## You need

- ☐ Paper or a small notebook
- ☐ Pencil
- ☐ A clear night sky

## Steps

- 1** Each evening at the same time, look at the Moon. If it is cloudy, write cloudy.
- 2** Draw its shape inside a circle.
- 3** Note where in the sky you saw it.
- 4** After a week, put your drawings in order.

Safety: Ask a grown-up to be with you when you go outside at night.

## Before you start: what do I think will happen?

## My observations

Table 1. My Moon diary

| Night   | Date and time | Sky (clear or cloudy) | Moon shape (draw or describe) | Where I saw it |
|---------|---------------|-----------------------|-------------------------------|----------------|
| Night 1 |               |                       |                               |                |
| Night 2 |               |                       |                               |                |
| Night 3 |               |                       |                               |                |
| Night 4 |               |                       |                               |                |
| Night 5 |               |                       |                               |                |
| Night 6 |               |                       |                               |                |
| Night 7 |               |                       |                               |                |

## Think about it

What pattern did you notice?

What else in the sky could you track?
