

Sound Effects Lab

Time: 25 minutes

You need

- ☐ Everyday objects such as crinkly paper, a cloth, shoes, a bowl of water
- ☐ A phone or recorder (optional)
- ☐ Paper and pencil

Steps

- 1** Pick a short scene, such as walking in snow, rain, or a creaky door.
- 2** Try different objects until the sound feels right.
- 3** Perform the sound live while a friend acts the scene, or record it.
- 4** Write down which object made which sound.

Before you start: what do I think will happen?

My observations

Table 1. My sound lab

Sound I want	Object I tried	Did it sound right? (1 to 5)	Best object
Sound 1			
Sound 2			
Sound 3			
Sound 4			

Think about it

Which sound surprised you?

Why use everyday objects instead of the real thing?
